# Directions

## Create custom name practice sheets for your child in less than a minute!

- Download this file to your computer. (Do not open it in "Preview" mode, in a web browser, or from a generic PDF reader.)
- Open Adobe Reader. Then open the "Name Practice" file.
- Type your child's information HERE:

| Name | First Letter |
| --- | --- |
| Sample | S |

- Save the file. Print the pages. All of the name fields, special tracing fonts, and activities will fill in automatically!
- This file is intended for home use with 1 child. If you have multiple children, just change the name above and print.
- Teachers who want to print class sets of name practice sheets should try this resource instead.

# Learning Names

The first step toward reading, writing, and early literacy occurs when children learn their names! They need daily practice with these skills:

- **identifying** the first letter
- **recognizing** the name in print
- **spelling** the name orally
- **writing** the name freely
- **tracing** the name (improves size & spacing)

This set includes 30 different options, increasing in difficulty. Choose the page that best meets your child's need. Save each of your child's practice pages and collate them into a book.

Watch your child improve over time and keep their "Name Book" as a special keepsake!
