

5 St. Patrick's Day Centers Included

2 math centers

Counting

One to One Correspondence

Counting is a key mathematical idea on which all other number concepts are based. It needs to be practiced daily and in a variety of meaningful ways.

Objectives:

- The students will demonstrate one-to-one correspondence.
- The students will count sets and make combinations of objects to create each set.

Procedure:

- Print, laminate, and cut out the leprechaun, coins, and numbers.
- Students choose a number from the pile and place that many coins on the pot.
 - Alternatively, hide coins around the room. Students select a number, then hunt for the coins to add to the leprechaun's pot.

Computation

Adding

Developing an understanding of computation is an important skill for young learners. Building on counting skills, computation involves combining and separating groups of objects as a precursor to addition and subtraction.

Objective:

- The students will count sets to 5 and 10 and make combinations of objects to create each set.

Procedure:

- Print, mat, laminate, and cut apart the cover cards. Print and laminate the "My addition problem" page.
- Students select a card and color in that many covers on their addition sheet with a dry erase marker. The student will then select another card and color in that number of covers on the second row. Be sure to only use the level of cards appropriate for your students.
- Students will then count how many total covers they have and write the addition problem at the bottom of the page.
 - Alternatively, print the sheets in black and white and use green plastic counters instead of a dry erase marker.

2 literacy centers

Oral Language

Rhyming

Oral language skills build a solid foundation in early reading and writing. Daily language play and exposure to repeated songs and stories help form this foundation.

Objective:

- The students will play with words, sounds, and rhymes.

Procedure:

- Print, cut, and laminate the pictures. Attach the leprechaun pictures at eye level on a bulletin board or bookshelf.
- Students move to each card, recite the poem, and act out the motions.
 - Alternatively, mat the cards on different colored cardstock. Provide a bowl of matching colored cut-out clothes to replicate the leprechaun's pot of gold. The student will reach in the pot, select a colored clothe, identify the matching colored card and turn it over to read.

Letter Recognition

Matching Game

Letter knowledge is essential to the start of reading and writing. Success in reading can be seen in connections of understanding the relationship between functions of letters and writing.

Objective:

- The students will recognize letters of the alphabet.

Procedure:

- Print, cut, mat, and laminate the cards. Mount pots to a bulletin board or magnetic whiteboard. Drape string or cord above each row of pots.
- Students select a gold coin and clip it to the matching pot using a clothes pin.
 - Alternatively, write capital letters on small black cups. Students select a coin and put it in the matching "pot."

1 fine motor center

St. Patrick's Day Lines

Cutting Practice

Fine Motor refers to the small muscles in our bodies - fingers & hands, toes, lips & tongue, and even eyes! In preschool, young children need to practice these essential fine motor skills that are crucial to their reading and writing success in school later on.

Objective:

- The students will control the small muscles of their hands.

Procedure:

- Print a cutting page for each student. Demonstrate proper scissor usage and guide students to cut along the dotted lines.
- The students use scissors to cut along each dotted line.

- The students will count sets and make combinations of objects to create each set.

Procedure:

1. Print, laminate, and cut out the leprechaun, coins, and numbers.
2. Students choose a number from the pile and place that many coins on the pot.
 - Alternatively, hide coins around the room. Students select a number, then hunt for the coins to add to the leprechaun's pot.

Name _____	
Count the number of pictures in each row. Trace the correct number.	
 3 7 8	
 5 1 2	
 1 4 2	

Recording Sheet

Computation

Adding

Developing an understanding of computation is an important skill for young learners. Building on counting skills, computation involves combining and separating groups of objects as a precursor to addition and subtraction.

Objective:

- The students will count sets to 5 and 10 and make combinations of objects to create each set.

Procedure:

- Print, mat, laminate, and cut apart the clover cards. Print and laminate the "My addition problem" page.
- Students select a card and color in that many clovers on their addition sheet with a dry erase marker. The student will then select another card and color in that number of clovers on the second row. Be sure to only use the level of cards appropriate for your students.
- Students will then count how many total clovers they have and write the addition problem at the bottom of the page.

Name _____

Count the total number of clovers.
Write the number on the line.

	+		=	<u>2</u>
	+		=	_____
	+		=	_____

Recording Sheet

and write the addition problem at the bottom of the page.

- Alternatively, print the sheets in black and white and use green plastic counters instead of a dry erase marker.

My addition problem

2 clovers + 1 clovers =

3 total clovers
